PERSONAL STATEMENT: As a passionate Computer Science student with a solid understanding of algorithms, data structures, and using Dev tools as well as programming languages. I bring practical experience from collaborative industry projects involving geospatial AI and SaaS development, I seek to apply my skills in a dynamic internship environment while continuing to grow professionally and technically.

FORMAL EDUCATION DETAILS

March 2026 – Present	Bachelor of Computer Science (Honours) Griffith University, QLD
July 2023 – Dec 2025	Bachelor of Computer Science Griffith University, QLD

PROFESSIONAL EXPERIENCE

Web Developer | July 2025 – September 2025

AI-Powered Q&A Assistant

Collaboration with TENSORACT Co., Ltd and a High School in Ho Chi Minh City, Vietnam

- Developing a web-based AI assistant to help high school students explore university and career pathways based on their academic strengths, personal interests, and family financial situation.
- Integrated Gemini API to deliver personalized, conversational guidance in Vietnamese and English. Built the frontend using TypeScript and JavaScript, focusing on clean, accessible design for teenagers and developed backend services in Python, including query processing, session handling, and API integration.

Frontend and Backend Developer (5-member team) | Mar 2025 – June 2025

CopperCore AI Project – WIL

OreFox - Brisbane, QLD, Australia

- Led both frontend and backend development in a geospatial Copper prediction web platform.
- Designed UIs using Django templates, HTML/CSS, HTMX, and JavaScript.

- Architected backend with Django, integrated PostgreSQL + PostGIS for spatial data support, and developed core features including: Dataset uploads (raster/vector), Raster resampling and CRS transformations, Vector proximity analysis, Results prediction and visualization.
- Built and deployed machine learning models using TensorFlow, Keras, and scikit-learn, implementing both CNN and Random Forest algorithms.
- Visualised predictions as heatmaps (Matplotlib) and mapped results using Leaflet.js. Enabled CSV exports for predicted data.
- Set up Redis and Celery for managing asynchronous preprocessing tasks.

AWARDS

2024 and 2025

Achieved The Griffith Award for Academic Excellence in the Bachelor Of Computer Science in Griffith University.

TECHNICAL SKILLS OVERVIEW

- **Programming & Coding:** Python, C, C++, JavaScript, HTML, CSS, PHP.
- **Web Development:** Laravel, Django, HTMX, React.
- **Databases:** PostgreSQL (PostGIS), MySQL.
- **DevOps Tools:** Experienced with Docker, Kubernetes, Git, Redis, Celery, Azure, AWS, APIs
- **AI/ML:** TensorFlow, Keras, scikit-learn.

MISCELLANEOUS SKILLS

- Strengthened collaboration and patience by coordinating across a diverse team in a 5-member industry project.
- Demonstrated adaptability and problem-solving by independently designing and deploying a full-stack AI web assistant under real user needs.
