

THANH Y NGUYEN

AI & Full-Stack Developer | Honours Computer Science Student

Robertson, QLD | +61 426 685 752 | ynguyenhk@gmail.com | linkedin.com/in/thanh-y-nguyen-803a6726a | github.com/healerHK

Honours Computer Science student building AI-assisted research tools, full-stack web platforms and practical IT systems across Django/FastAPI, React, geospatial ML, IT support and research communities.

EDUCATION

Bachelor of Computer Science (Honours), Griffith University, QLD

Mar 2026 – Present

Research focus: LLMs, Agentic AI, RAG, knowledge graphs and evidence-centered research systems.

Bachelor of Computer Science, Griffith University, QLD

Jul 2023 – Dec 2025

GPA: 6/7 | Griffith Award for Academic Excellence: 2024 and 2025

PROFESSIONAL EXPERIENCE

Web Developer — AI-Powered Career Q&A Assistant

Jul 2025 – Sep 2025

TENSORACT Co., Ltd / High School Partner, Ho Chi Minh City, Vietnam

- Built a multilingual Gemini-powered assistant helping high-school students explore university and career pathways from strengths, interests and family context.
- Implemented TypeScript/JavaScript frontend flows and Python backend services for query processing, session handling and Gemini API integration.

Full Stack & AI Developer (Industry WIL) — CopperCore AI Project

Mar 2025 – Jun 2025

OreFox, Brisbane, QLD

- Led frontend and backend delivery in a 5-member team building a geospatial copper-prediction platform with Django, HTMX, JavaScript and PostgreSQL/PostGIS.
- Built spatial workflows for raster/vector upload, CRS transformation, proximity analysis, prediction visualisation and CSV export.
- Developed ML experiments with TensorFlow, Keras and scikit-learn, including CNN and Random Forest models.

IT Support Technician — Field Workstation Setup

Apr 2025 – May 2025

ENbridge IT Services, Australia

- Supported high-school device rollout by preparing Windows workstations, installing required software, checking peripherals and validating classroom readiness.

SELECTED PROJECTS

ResearchAI — Evidence-Centered Human-AI Research Environment | Python, FastAPI, React, TypeScript, ChromaDB, RAG

- Built an open-source research augmentation platform for citation-grounded paper retrieval, semantic search, evidence verification and Obsidian research-brain export.

Cattle Farm Management System — Private Business Operations Platform | Django REST Framework, React, PostgreSQL, Docker

- Built a private operations platform for a small cattle-farm business in Vietnam, covering cattle lots, finance, debt tracking, reports and customer cota settlement.

EventApp — Event Management Web Application | Laravel, PHP, Blade, Vite, Tailwind CSS

- Built a Laravel event-management app with authentication, roles, event browsing, bookings, categories and automated feature tests.

LEADERSHIP, RESEARCH & AWARDS

- Student Volunteer Chair, ADC 2024** — Gold Coast, Australia & Tokyo, Japan; supported volunteer coordination, session logistics and attendee experience for an international database conference.
- Honours research direction: LLMs, Agentic AI, RAG, knowledge graphs and AI-assisted research environments.
- Griffith Award for Academic Excellence 2024–2025; ABN Hackathon and NextGen AI Startup Hackathon participant.

TECHNICAL SKILLS

AI / ML: LLMs, RAG, Agentic AI, prompt engineering, ChromaDB, knowledge graphs, TensorFlow, Keras, scikit-learn, Gemini API

Backend: Python, FastAPI, Django, Django REST Framework, REST APIs, Laravel, PHP, Redis, Celery

Frontend: React, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, HTMX, Blade

Data / Tools: PostgreSQL, PostGIS, MySQL, Docker, Git, GitHub, Postman, Obsidian, PyMuPDF, Google AI Studio
