

THANH Y NGUYEN

Honours Computer Science Student | AI & Full-Stack Developer

Robertson, QLD | +61 426 685 752 | ynguyenhk@gmail.com | linkedin.com/in/thanh-y-nguyen-803a6726a | github.com/healerHK

EDUCATION

Bachelor of Computer Science (Honours), Griffith University, QLD Research focus: LLMs, Agentic AI, RAG, knowledge graphs and evidence-centered research systems.	Mar 2026 – Present
Bachelor of Computer Science, Griffith University, QLD GPA: 6/7 Griffith Award for Academic Excellence: 2024 and 2025	Jul 2023 – Dec 2025

PROFESSIONAL EXPERIENCE

Web Developer — AI-Powered Career Q&A Assistant <i>TENSORACT Co., Ltd / High School Partner, Ho Chi Minh City, Vietnam</i> - Built a multilingual Gemini-powered web assistant helping high-school students explore university and career pathways based on strengths, interests and family context. - Implemented TypeScript/JavaScript frontend flows and Python backend services for query processing, session handling and Gemini API integration.	Jul 2025 – Sep 2025
Full Stack & AI Developer (Industry WIL) — CopperCore AI Project <i>OreFox, Brisbane, QLD</i> - Led frontend and backend development in a 5-member team building a geospatial copper-prediction platform with Django, HTMX, JavaScript and PostgreSQL/PostGIS. - Built spatial data workflows for raster/vector upload, CRS transformation, proximity analysis, prediction visualisation and CSV export. - Developed ML components with TensorFlow, Keras and scikit-learn, including CNN and Random Forest prediction experiments. - Set up Redis and Celery for asynchronous geospatial preprocessing tasks.	Mar 2025 – Jun 2025

SELECTED PROJECTS

ResearchAI — Evidence-Centered Human-AI Research Environment Python, FastAPI, React, TypeScript, ChromaDB, RAG Built an open-source research augmentation platform for citation-grounded paper retrieval, semantic search, evidence verification and Obsidian research-brain export.
Cattle Farm Management System — Private Business Operations Platform Django REST Framework, React, PostgreSQL, Docker Built a private operations platform for a small cattle-farm business in Vietnam, covering cattle lots, finance, debt tracking, reports and customer cota settlement.
EventApp — Event Management Web Application Laravel, PHP, Blade, Vite, Tailwind CSS Built a Laravel event-management app with authentication, roles, event browsing, bookings, categories and automated feature tests.

RESEARCH, AWARDS & ACTIVITIES

- Honours research direction: LLMs, Agentic AI, RAG, knowledge graphs and AI-assisted research environments.
- Literature review work on AGI with Prof. Peter Bernus; participated in Griffith 3-Minute Research/Pitching activities.
- ABN Hackathon (Griffith & QUT) and NextGen AI Startup Hackathon, Cohort Innovation Space.

TECHNICAL SKILLS

AI / ML: LLMs, RAG, Agentic AI, prompt engineering, ChromaDB, knowledge graphs, TensorFlow, Keras, scikit-learn, Gemini API
Backend: Python, FastAPI, Django, Django REST Framework, REST APIs, Laravel, PHP, Redis, Celery
Frontend: React, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, HTMX, Blade
Data / Tools: PostgreSQL, PostGIS, MySQL, Docker, Git, GitHub, Postman, Obsidian, PyMuPDF, Google AI Studio
